

Penn Nursing's Guiding Principles for Learning and Working Together

Embrace Diversity and Inclusion

We accept diverse identities, ideas, and thoughts and believe diversity strengthens our School.

Treat Others with Respect

We affirm that everyone should be treated with thoughtfulness and consideration. We hold ourselves and one another accountable for ensuring that all who enter Penn Nursing are treated with respect.

Act with Empathy

We care about our Penn Nursing community. We act in compassionate ways and advocate as necessary to demonstrate that we care for and support all members.

Dialogue to Learn

We listen to one another and engage in conversations that foster the exchange of ideas to promote the growth of our School. We cultivate brave spaces to speak up when we do not understand or agree with others.

Strive for Excellence

We are committed to working individually and collectively in ways that share our intellect, expertise, and talents and provide spaces for individuals to grow.
