

Oncology Nurse Practitioner Confidence in having Clinical Trial Inclusive Conversations with Racial and Ethnic Minority Groups

Confidence Improves with education focused on underrepresented minority barriers to participation in clinical trials and communication techniques

Population

Academic (N=6) and non-academic (N=8) Nurse practitioners who hold a certification in Oncology through the Oncology Nursing Certification Corporation (ONCC)

Methods & Intervention

Emails sent out via the ONCC to over 1000 Nurse Practitioners to participate.
20 minute Video Intervention
Pre and Post Intervention Survey completed

Outcomes

Overall median Confidence scores improved post intervention
A 14% improvement in confidence was seen in non-academic setting.
