

# Serious Illness Conversation Program Training with Home Care Nurses

## Improved Anxiety and Confidence with Sustainability to Clinical Practice Change

Participants were 13 Home Care Nurses

### Main measures

1. Documentation
2. Nurses' Perceptions

### Balancing Measures

1. Beneficial
2. Intent to use

Survey Item	Pre-Training Median (SD)	Post-Training Median (SD)	4-weeks Post-Training Median (SD)
Familiarity with SICP	4 (1.3)	1 (1.2)	1 (0)
Confidence in conversation	3 (1)	2 (0.9)	1 (0.5)
Anxiety planning discussion	2 (0.8)	3 (1.1)	3.5 (1.6)
Training was beneficial			1 (0)
Will not use the tool			5 (0.7)

### Training

Training with modified SICP evaluating anxiety and confidence

### Nursing Impressions

Improved anxiety and confidence but nurses need better documentation tool

### Communication

Feedback from nursing leads to a "Smartform" to increase documentation
